For Immediate Release, April 4, 2017

## **Second Quarter 2017 U.S. firearms sales forecast of 3.0 million units**

(Greenville, SC, USA and Halifax, NS, Canada) – *Small Arms Analytics & Forecasting* (SAAF) projects U.S. firearms sales of 3.0 million units for the second quarter of 2017 (April to June). For comparison, SAAF-adjusted firearms sales in the second quarter of 2016 were 3.3 million.

SAAF-adjusted firearms sales and forecasts are based on raw data taken from the FBI's National Instant Criminal Background Check System (NICS), adjusted for checks unrelated to end-user firearms sales. Forecasts made public by SAAF are technical forecasts given past data and do not intend to anticipate firearms-related events or controversies that may sway sales.

SAAF Chief Economist and Augusta University economics professor Jurgen Brauer comments that "while the industry is likely to experience sales reductions in 2017 relative to 2016, continued population growth and economic recovery will moderate the sales decline."
