For Immediate Release, October 5, 2017

U.S. firearms sales Projected 11% sales decline from 2016 to 2017

Third Quarter 2017 actual: 3.1 million units

Fourth Quarter 2017 forecast: 4.6 million units

(GREENVILLE, SC, USA & HALIFAX, NS, CANADA) – Small Arms Analytics & Forecasting (SAAF) estimates that third quarter 2017 U.S. firearms sales amounted to 3.1 million units (July: 950,101; August: 1,069,398; September: 1,057,476) and projects fourth quarter sales of 4.6 million units (October to December). For comparison, SAAF-adjusted firearms sales in the fourth quarter of 2017 were 5.1 million. For the whole year of 2017, SAAF now expects unit sales of 14.8 million units, an 11% decline from the 16.6 million for the whole of 2016.

SAAF-adjusted firearms sales and forecasts are based on raw data taken from the FBI's National Instant Criminal Background Check System (NICS), adjusted for checks unrelated to end-user firearms sales such as so-called permit checks. Forecasts made public by SAAF are technical forecasts given past data and are not intended to anticipate firearms-related events or controversies that may sway sales.

SAAF Chief Economist Jurgen Brauer comments that “despite revived debate regarding firearms legislation in the wake of the Las Vegas mass shooting on October 1, 2017, which tends to increase sales, and despite the upcoming hunting, Thanksgiving, and Christmas seasons, the industry still is likely to experience overall sales reductions in 2017 relative to 2016.”
